

8th Grade Science
Introduction to Matter Book

Chapter Three: Elements, Compounds & Mixtures (pg 55-79)

For each word listed below, write the word on a piece of notebook paper, underline the word and then write the definition after the word. (Students are encouraged to take the definition from the actual text because that is the definition that will be used on quizzes and tests).

Vocabulary:

Element	pure substance	
	characteristic	properties
Metals	nonmetals	metalloids
Compound	molecule	mixture
Solution	dissolving	solute
Solvent	Soluble	insoluble
Alloys	Concentration	solubility
Suspension	colloid
