

Animal Report #3

My animal is _____

My Name is _____

The following information will be gathered by the student. Each page will have new information about the animal. Once all of the information is gathered each student will use that information to build a presentation that they will present to the class.

16. Describe any special coloring that the male would have and what it is used for. _____

17. Describe any special coloring that the female would have and what it is used for. _____

18. Does the animal have any special coloring that helps it blend in with its environment? Describe it.

19. What is the body covering of the animal (fur, spines, scales, skin, etc.)? _____

20. How does the animal's covering help it survive (temperatures, predators, etc.)? _____

21. What special adaptations does your animal have that helps it live in its environment? (Example: the giraffe has a really long neck to reach its food source and tough lips so the thorns don't hurt)

22. On the back of this paper, sketch a diagram of the tail of your animal.
