

## Caring for our surroundings-

1. What is a watershed?
2. What is our watershed (where we live) called?
3. What is runoff?
4. Where does runoff go? Where does runoff in Rainier go?
5. What problems might be caused by runoff water from paved land?
6. How does human development, especially cities, affect aquatic life and the aquatic environment?
7. How does the condition of the watershed impact the life of a salmon?
8. What are 10 things people might do to reduce the impact we have on water runoff and the negative impact it has on salmon?
