

Environment Topics Requirements-

1. State clearly the issue including all the details that make it an issue.

*Simply stating that you think plastic bags are bad is not good enough

*Simply stating that you think there aren't any issues with burning fossil fuels isn't good enough

2. State your position on the issue, are you for or against and then use supporting evidence to back up your position of why you are for or against.

*I think it should be mandatory that all households recycle and if they do not, they should pay a fine is a good start...but you must include supporting evidence for this, your opinion without support is just useless talk

*Clean energy should be the only options for energy consumption is a good start...but without supporting evidence, it is just babble.

3. You must include a bibliography of all sources used and all websites used. REMEMBER THAT USING GOOGLE IS **NOT** A SOURCE, IT IS A SEARCHENGINE!

4. Your paper should be one page front and back at a minimum NOT including the bibliography.
